Research Plan for Psychology Department (2025-2029)

Objectives	Activities	Mechanism	Outputs	Success Indicators	Implementation periods	Finance source	Section responsible for implementation
1. Excellence in scientific researches in terms of novelty and variety of research topics	Leveraging the research partnerships and agreement of joint cooperation with regional and international universities	<ul style="list-style-type: none"> - Cooperating with the Chinese University in the field of seniors care, and supporting Master's students who applied for the Chinese Scholarship - Following up the updates of research partnerships made by the University to make good use of them 	<ul style="list-style-type: none"> - Joint supervision of Master's and Doctoral theses - Utilizing the agreements to pay scientific visits to the professors in the international universities 	<ul style="list-style-type: none"> - Number of students who took the courses through the agreement - Number of joint theses between the Section and Chinese university - Number of students who received the scholarship and how beneficial it was. 	2025-2029	Faculty budget	Scientific Section
	Using the modern psychology schools, therapeutic and counseling trends, and understanding the variables compatible with the society needs in researches	<ul style="list-style-type: none"> - Introducing modern and innovative topics during seminars - Developing training plan to develop the research skills of students 	<ul style="list-style-type: none"> - Developed modern researches with applied dimensions - Upgrade the researches quality - Labor market service in the discipline field and helping the society segments 	<ul style="list-style-type: none"> - Number of researches published and approved to be published in distinguished journals - Number of researches that won national, regional, and international awards 	2025-2029	Faculty budget	Scientific Section
2. Promoting enrollment in postgraduate studies among Section graduates and newcomers to continue their academic study after graduation	Developing the regulations of post studies based on credited hours	- following the recent development in the discipline field and develop new curriculums that cover the latest trends of psychology study	- Modern specifications for updated curriculums	<ul style="list-style-type: none"> - Increase in the number of students accepted, either graduates or international students in the postgraduate programs provided by the Section - Diversity of universities from which the applicants were graduated on local and regional level 	2025-2029	Faculty budget	Scientific Section
	Focusing on the applied aspect in the curriculums	<ul style="list-style-type: none"> - Upgrade psychology laboratory - Increase the number of training centers 	<ul style="list-style-type: none"> - Develop the skills of applying the psychological measures and tests - Develop the professional skills for the program beneficiaries 	<ul style="list-style-type: none"> - Satisfaction survey of students for the training activities - Satisfaction survey of the training institution for the students' performance 			
3. Enhancing the effectiveness of syllabuses and postgraduate programs, and making sure that they are compliant with	- Regular review of the programs and curriculums of postgraduate existing in the section	- Assigning the section professors to review the curriculums specifications in the different programs	- Amend the description of programs and curriculums in accordance with the recent description of	Amend 80% of the descriptions of the programs and curriculums in accordance with the sample descriptions adopted in the first	2025-2029	Faculty budget	Scientific Section

the professional and scientific metrics required and the expectations of the concerned parties			quality authority, and update them every three years	year until it reaches 100% in the next year.			
	- Conduct referential comparisons with similar programs in the Arab and international universities to develop the existing programs and propose new programs that keep up with the scientific development in the field	- Assigning the section professors to conduct referential comparisons to develop the programs and suggest new programs	- A report that shows the Arab and international programs compared with the section programs, and proposals to develop the programs by adding or removing curriculums to be in line with the international programs	- Increase in the compatibility ratios of the updated programs and curriculums with similar Arab and international programs			
	- Form advisory committee consisted of section staff and those who work in the psychological field to review the developed and proposed programs and curriculums	- The section head shall prepare the organizational structure and framework of the advisory committee of the postgraduate studies in the section	- Preparation of organizational structure for the advisory committee with the members' names, committee roles, convention dates, and mechanism of implementing the proposals listed.	- Increase of ratios of advisory committee approval to the updated curriculums and programs, and increase in implementation the amendments of the advisory committee.			
4. Local and international publishing	- Participating in local, regional, and international conferences	- Selecting specialized conferences that address emerging topics.	- Researches accepted in arbitrated conferences for institution with scientific reputation.	- Number of scientific participations including researches, scientific papers, and posters. - A number of courses and workshops offered in the conferences by the section members	2025-2029	Faculty budget	Scientific Section
	- Published books on local and regional levels	- Writing scientific books in emerging topics that enrich the discipline field	- Increase the scientific knowledge of learners and members of Section, and develop the scientific and cultural activity	- Number of books published locally and regionally	2025-2029	Faculty budget	Scientific Section
5. Cooperate with business organization in labor market	- Conduct joint workshops with businesses to determine the needs of labor market	- First phase (1-3 months): Prepare field studies and create communication channels	Number of students who benefit from training programs	Increase in graduates employment in labor market	2025-2029	Faculty budget	Scientific Section
	- Create platform to link students and graduates to businesses	Second phase (4-6 months): commencement of implementing the training programs and organizing events	Number of jobs or training opportunities that the graduates obtained	Increase of businesses satisfaction for the level of graduates skills			

	<ul style="list-style-type: none"> - Provided targeted training programs in collaboration with businesses 	Third phase (6-12 months): assess the results and document the successes and challenges.	Final report that documents the results of cooperation and its impact on skills improvement and satisfying the market needs	Growth in number of partnerships with businesses annually.			
	<ul style="list-style-type: none"> - Organize networking events between students and businessmen 	Ongoing phase: update the programs and partnerships based on the feedback	Develop long-term partnerships with businesses through memorandums of understanding.	Positive assessment from the students taking part in the training activities.			
	<ul style="list-style-type: none"> - Sign cooperation agreements with companies and organizations in the market 	Provide administrative support					
6. Collaboration with academic experts	Collaborate with experts and specialists in the field and from different professional sectors to support the educational and research processes.	<ul style="list-style-type: none"> - The experts shall take part in inspection committees and discussing the theses in the section - Invite the experts to attend the scientific seminar in the section. 	Effective investment by the experts in the field	<ul style="list-style-type: none"> - Increase the number of joint researches with experts 			
7- Preparing staff in the field of scientific research	Following up the updates in the discipline and continuous development for honor graduates, train them professionally and academically	A request to appoint 2 support bodies per year to ensure the continuity of research and academic process	Graduate staff capable of achieving the section mission	The support body shall obtain scholarship and overseas delegations	2025-2029	Faculty budget	Scientific Section
8. Local, regional, and international contributions	Membership of professional associations and board of local, regional, and international information institutions	<ul style="list-style-type: none"> - Candidacy of membership in board of directors of the professional associations and scientific committee thereof. 	Effective contributions in developing the information institutions and professional associations.	At least 40% of faculty members and their assistants shall subscribe in specialized journals like Psychological Guidance Journal and Psychology Journal	2025-2029	Faculty budget	Scientific Section
9. Enriching the cultural movement regionally and internationally	Taking part in the cultural conferences, forums, and events.	Giving awareness lectures and taking part in cultural forms and meetings.	Oral or written scientific product that support the cultural movement and increase the information awareness of the society	Increase in the percentage of annual participation in the cultural meetings locally, regionally, and internationally.	2025-2029	Faculty budget	Scientific Section
10. Developing the interdisciplinary, economical, and social services in the various cognitive and scientific fields	Develop a study to determine the interdisciplinary, social, and economic needs	Conducting a survey for the information institutions to know their problems and needs	Making available data and information about the actual needs of the society	Preparing studies that meet the society needs	2025-2029	Faculty budget	Scientific Section

Department Research Priorities

- Psychology and AI
- Psychology in work setting
- Psychological therapies using VR
- The phenomenon of drug use and addictions and means of combat on social and psychological levels
- Social responsibilities and value systems
- National and psychological identity and ways to develop it

Topics in which the research shall be suspended

- Traditional psychological analysis
- Study of neurosis
- The studies that depend on old diagnosis criteria for the guide of statistical and clinical diagnosis for psychological disorders.
- Personality study that is based on Sheldon's Theory.
- Studies based on Lombroso's theory of criminal behavior.

Annex 1

Opinion survey of faculty members to develop the five-year research plan

[2025/2029]

Dear colleagues,

Greetings,

The committee of preparing the research plan section is developing the five-year research plan for the academic year 2025/2029 in order to keep up with the scientific development and upgrade the researches level in the section, therefore kindly share your opinions with us concerning the following points:

Basic data

1. Name of the member:
2. Professional rank:
3. Discipline:

Data related to the research plan

4. List the intellectual production you prepared during the previous ten years
-
-
5. Specify the topical fields in which the research shall be suspended in the future
-
-
6. What are the research priorities to be focused in the research plan of libraries and information section 2018-2022 (*ordered by priority*)
-
-
7. Suggest the interdisciplinary research fields to be focused in the research plan of libraries and information section 2018-2022 (*ordered by priority*)
-
-

Annex 2

Opinion survey of stakeholders from Section, Helwan University to develop the five-year research plan – (2025/2029)

Dear colleagues,

Greetings,

..... Section is preparing a research plan to face the research needs of the society to keep up with the scientific and professional development locally, regionally, and internationally.

Kindly share your opinions with us to develop a mechanism to link the scientific research to the actual needs and solve the field-related problems in the professional work and consolidate the methods of collaboration with you.

Basic data:

1. Name
2. Employer
3. Educational qualification
4. Profession:
5. Experience duration:

Date related to leveraging the section researches

6. Are the results of scientific researched conducted by the section in your workplace being utilized?
- Yes () [go to question No. 8] - No ()
7. If the answer is (no), what are the reasons of lack of benefit from your point of view? (you can choose one than one)
 - Failure to deliver the results of the scientific research conducted by the section to the relevant work entities. ()
 - The research conducted by the section does not reflect the actual needs and problems faced in the field. ()
 - Lack of support from those in charge of information facilities for benefiting from research in the professional field. ()
 - Lack of mechanisms within the section for marketing the scientific research it produces. ()
 - Other (please specify the reasons):
